# Camozzi Fittings

Camozzi's standard range of fittings includes rapid, super rapid, and universal options, accessories, quick-release brass, technopolymer, and stainless-steel couplings.

Each component guarantees reliable sealing over time, minimising the risk of leakages. The range comprises various shapes and configurations, making mounting on any device or machine easy.

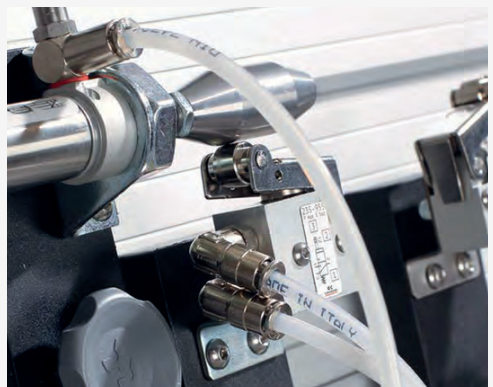

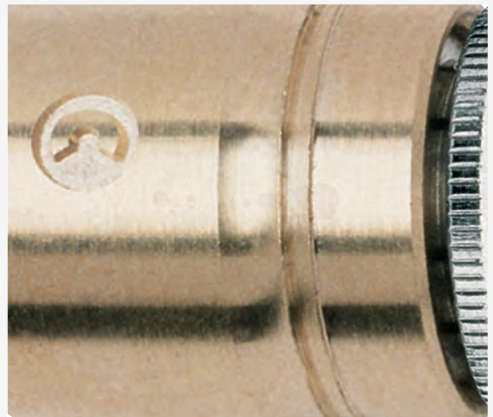

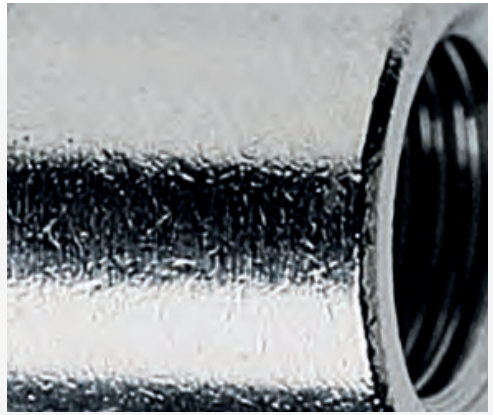

Series 5000 quick-release couplings are ideal when tubing needs to be repeatedly connected or disconnected for plant engineering or safety reasons. These couplings make it possible to perform these operations without releasing the pressure, saving valuable time.

## Applications

- Packaging
- Food and beverage
- Automotive
- Electronic system
- Assembly and robotics
- Printing and paper

## Available Ranges

- BSP Super Rapid Push-In Fittings for Plastic Tube

# John Guest Fittings

If you're looking for a reliable way to manage airflow, John Guest's push-fit fittings are an excellent option. These fittings are suitable for both small workshops and large industrial settings, and they can power various pneumatic tools, instruments, and ring main systems. With John Guest's push-fit fittings, you can assemble your compressed air and pneumatics systems quickly and easily without needing any tools.

The push-fit fittings from John Guest are made of rigid plastic and brass, providing excellent corrosion and pressure resistance. These fittings come in various sizes, making them suitable for various applications, including air, pneumatics, inert gases, vacuum, and potable liquids. Designed for easy and quick installation, the compressed air and pneumatic push-fit fittings from John Guest offer optimal airflow and pressure resistance, ensuring reliable performance.

They are designed for easy installation, require no tools, and provide airtight connections. They can be used for air piping systems up to 10 bar and are suitable for vacuum, inert gases, and potable liquid applications.

## Benefits

- Install air systems 50% faster with push-fit technology - no tools, threading, or solvents needed.
- Corrosion-resistant materials extend the lifecycle and efficiency of systems and equipment.
- Systems can be reconfigured quickly with minimal downtime thanks to demountable and interchangeable fittings that simplify layout changes.
- Moisture is eliminated from the airline to prevent equipment contamination, enhancing performance and longevity.
- Uninterrupted optimal airflow and quality – Airtight seal reduces energy consumption and eliminates pressure drops and leaks.
- Versatile solution for various pipes, including nylon, powder-coated aluminium, LLDPE, and soft metal.

## METRIC FITTINGS

As well as standard push-fit connections & metric fittings that work with specific threads, we offer selected fittings with SuperThread technology that enables them to be used with any thread type.

The special polyurethane seal feature means no sealant need be applied to make an airtight joint. There is no danger of tape entering the system.

Fittings with SuperThread also have countersunk throughbores to provide superior flow characteristics.

The design allows for a smaller compact body & reduced hexagon size.
